Предговор

Учителното евангелие на Константин Преславски[1] (нататък УЕ) – сбирка от 51 неделни проповеди – съчетава преводни тълкувания върху евангелските перикопи с оригинални и оригинално-компилативни уводи и заключения. Открито през 1846 г. от руския учен Вукол Ундолски при работата му със сбирката на Синодалната библиотека в Москва, то вече близо 180 години привлича вниманието на палеославистите[2]. Причините за това са много, но тук ще изтъкна някои от тях. Този текстов корпус е не само най-обемният дидактичен сборник в старобългарската литература, но и най-ранният, при това със сравнително точна датировка на възникването му – преди 893 г.[3] Той се нарежда сред малкото средновековни преводи, името на чийто автор е известно, и заедно с Четирите слова против арианите от Атанасий Александрийски съставя фонда от творби, преведени от Методиевия ученик Константин[4]. Комбинацията от голям обем, централен за средновековната литература жанр, точна датировка и доказано авторство прави този паметник безценен извор за началния етап от изграждането на първия писмен език на славяните.

Въпреки това повече от век и половина сбирката нямаше пълно научно издание. Според архивите на откривателя на Синодалния препис той е възнамерявал да я издаде в сътрудничество

[1] За авторството на УЕ е писано доста, вж. обзора на М. Тихова и посочената там литература (Тихова 2012: XI-XII). Последна систематизация на данните за личността на Константин Преславски вж. у Браксаторис 2022.

[4] Авторството на превода на Четирите слова против арианите и датировката му се определят по известната приписка на Тодор Доксов (вж. за нея Стойкова 2008: 244 и посочената там литература; последното ѝ издание вж. у Славова 2022: 7). Съществуват различни интерпретации на посочената година 6414 от Сътворението на света – 906 г. (Милев 1977: 63-65) или 902 г. (Добрев 2011: 128).

с О. Бодянски[5], но не успява да осъществи начинанието. По този или други междувременно оповестени преписи през XIX столетие са публикувани малко повече от половината слова, както следва: от В. Ягич[6] – 28-о и 42-о слово; от архиепископ Антоний – слова 1, 12, 14, 23, 28, 32, 33, 36, 37, 41, 43, 45, 46, 47, 48, 49 и 50[7], а от Г. Михайлов – слова 2, 7, 9, 10, 15, 26, 27, 29 и 30[8]. През XX в. към тях е добавено 4-то слово от А. Вайан[9], а от Е. Галучи – 47-мо и Азбучната молитва по руската и южнославянската традиция[10]. Едва през 2012 г. в резултат от дългогодишния труд на доц. Мария Тихова и издателския ангажимент на проф. Екхарт Вайер – двама за съжаление вече покойни колеги – в научно обръщение влезе цялостният текст на *Учителното евангелие*[11].

Дипломатичното издание на най-стария цялостен препис – Синодалния (ГИМ, Син. 262) с разночетения по трите други пълни преписа (Гилфердингов, Виенски и Хилендарски) и гръцки паралели по изданието на Крамер[12] не само намери отклик в научните среди – от възторжен[13] и положителен[14] до доста критичен[15], но и предизвика серия от приносни изследвания. Сред тях трябва да се споменат публикациите върху глаголната система като цяло и отделни глаголни категории от Т. Славова[16] и Г. Молков[17], комплексният анализ на УЕ като извор едновременно за езика на старобългарския

му оригинал и на староруския препис от В. Криско и Г. Молков, които изнасят много неотбелязани данни за неговия морфологичен и синтактичен строй[18], дискусионният опит на Р. Кривко да локализира възникването на УЕ в Охридско-Преспанския регион[19], приносната дисертация на Ж. Жикова върху текстологията и лексиката на дидактичната сбирка[20] и свързаните с нея статии[21].

Може да се каже обаче, че независимо от тези безспорни приноси в проучването на езика и текстологията на УЕ към края на 2020 година вече се усещаше нуждата от цялостен поглед върху речниковия обхват на паметника и преводаческите техники на Константин Преславски на лексикално и словообразувателно равнище. А основната причина за това бе, че науката не разполагаше със систематизация на изворовите данни под формата на двуезични словоуказатели. Този научен инструмент е неотменима предпоставка за комплексното научно осмисляне на словния инвентар на УЕ като корпус в контекста на старобългарското и среднобългарското лексикално богатство, като извор за жанровите специфики и индивидуалните преводачески предпочитания на лексикално равнище и като градиво в терминологичния развой на българския език. Дълг на българската научна общност бе да се попълни тази празнина в познанията за езика на един от най-значимите български средновековни книжовници, важна част от българското културно-историческо наследство. С тази задача се зае екипът на финансирания от Фонд „Научни изследвания“ проект „Словното богатство на *Учителното евангелие* на Константин Преславски: старобългарско-гръцки и гръцко-старобългарски речници индекси“ (договор КП-06-Н50/2 от 30.11.2020 г.). И така идеята, която бяхме обсъждали 6-7 години по-рано с издателката на сбирката Мария Тихова, тръгна към своята реализация.

Навременността на начинанието се подсили от научния контекст, в който то бе осъществено. Предприетото по-рано интензив-

но проучване на другия преведен корпус на Константин Преславски – Четирите слова против арианите, вече беше започнало да дава плодове – независими издания на Второ слово, едното с английски превод[22], на Трето слово съответно с новобългарски и английски превод[23], а паралелно с осъществяването на нашия проект бяха публикувани изданието на Първо слово с двуезични речници към него[24] и томът с изследвания[25].

Резултат от работата на осемчленния научен колектив на нашия проект през изтеклите четири години са близо 40 публикации, които добавиха нови знания за изворите на УЕ[26], начина на компилиране на беседите[27], преводаческото майсторство на епископ Константин[28], някои езикови особености на сбирката в контекста на средновековната преводна книжнина[29], интертекстуалните връзки[30], жанровите образци на Азбучната молитва[31], подходите към лексикографската обработка на материала[32]. Колеги извън екипа на проекта също допринесоха за осветляването на паметника от различни гледни точки чрез своите статии в наскоро излезлия сборник, посветен основно на него[33].

Главният резултат обаче от труда на международния ни състав са представените в настоящите два тома старобългарско-гръцки и гръцко-старобългарски речници индекси. Преди да се конкретизира приносът на изброените на титулната страница автори, за чиято работа по речниците ще стане дума малко по-долу, трябва специално да се споменат имената на двама колеги, изиграли ключова роля в изпълнението на проекта. Ахим Рабус от Фрайбургския университет обучи програмата *Transkribus* и превърна остарелите и вече електронно нечетими PDF-файлове, предоставени ни от покойната М. Тихова, в читаеми DOCX-файлове, с които нататък продължи работата. Мартин Русков от Миланския университет по обмислено от Л. Тасева филологическо задание създаде специално за нуждите на проекта комплект от програмни продукти, осигуряващи информационната среда за дигиталната изработка на речниците: *Extractor* за транспониране на старобългарския текст в табличен списък (Microsoft Excel) от словоупотреби със съответна индексация по основния ръкопис и паралелни разночетения по останалите; *Integrator* за интерпретиране на лексикографските анотации и генериране на два контролни азбучни индекса (старобългарско-гръцки и гръцко-старобългарски) въз основа на йерархизирана система от метаданни; *IndexGenerator* за автоматично създаване на окончателните старобългарско-гръцки и гръцко-старобългарски азбучни индекси; *Atergogenerator* за изработване на старобългарски и гръцки обратни речници[34]. Освен тях помощ на екипа оказа и докторантката Христина Давидкова от ИБЦТ – БАН, която попълваше данни за лексеми от УЕ и други старобългарски преводи, коментирани в научната литература.

Двата тома речници и показалци, които предлагаме на научната колегия, са в истинския смисъл на думата колективно дело. Освен сътрудничеството на тримата споменати колеги целият авторски екип работи отдадено в непрекъснат контакт, координация и взаимно допълване. Почти ежеседмичните няколкочасови заседания за обсъждане на трудни казуси по успоредяването или лематизацията на словоупотребите често се превръщаха в надграждащи знанията дискусии, от които всеки излизаше обогатен. Колкото и трудно да е понякога разграничаването на приносите на отделните участни-

ци, все пак ще се опитам да ги очертая, следвайки хронологията на нашата работа. Разчетените от А. Рабус чрез *Transkribus* файлове бяха коригирани според изданието на М. Тихова и допълнени ръчно с лексикографски значимите варианти в него от Е. Дикова и Л. Тасева. Посочените гръцки паралели по изданието на Крамер бяха извлечени поотделно за всяко слово от Г. Митов и И. П. Петров. В генерираните чрез програмата *Extractor* въз основа на старобългарските текстови файлове 52 таблици в Excel Л. Тасева, Е. Дикова, Д. Котова, И. П. Петров и Г. Митов нанесоха гръцките съответствия за всяка словоупотреба и направиха необходимите анотации. Междувременно течеше издирвателската работа за идентифициране на по-точни гръцки източници, която бе извършена главно от Д. Котова и отчасти (за 20 слово) от И. П. Петров. Техните проучвания доведоха до натрупването на голям масив липсваща в изданието на Крамер лексика в тълкувателните, но и в уводните и заключителните части. Паралелите, извлечени от над 40 византийски ръкописа и хомилиите на Йоан Златоуст, бяха допълнени от двамата учени, а Д. Котова подготви описанието на гръцките източници и таблицата с използваните за всяко слово извори. За да се верифицира едно или друго успоредяване, в хода на работата се налагаха многократни проверки в самите гръцки и славянски ръкописи, които бяха поети главно от Д. Котова и Л. Тасева. Лематизацията на славянските словоупотреби бе направена от Л. Тасева и Е. Дикова, а на гръцките – от И. П. Петров, Г. Митов и Д. Котова. В проверката на генерираните списъци и нанасянето на съответни корекции в таблиците се включиха Л. Тасева и П. Станковска за старобългарско-гръцките, а за гръцко-старобългарските – главно И. П. Петров. Окончателната проверка на индексите бе извършена от Л. Тасева, И. П. Петров, П. Станковска и Е. Дикова. Към установените от предишни изследователи библейски цитати бяха добавени новоиздирени от Г. Митов, Д. Котова и Е. Дикова, а двата списъка на цитати от Библията систематизира Г. Митов. Списъците на личните и географските имена, а също и показалеца на евангелските четива подготви Е. Дикова. Лексикографската концепция също е колективно дело, плод на многократно обсъждане, но окончателното прецизиране на формулировките направиха Л. Тасева и И. П. Петров.

В речниците, които бяха изработени благодарение на плодотворното сътрудничество на екипа ни, се съчетават утвърдени и иновативни за палеославистичната двуезична текстовообвързана лексикография подходи. В голяма част от съвременните двуезични речници се изброяват конкретните словоупотреби, понякога и с граматични характеристики[35]. Ние се отказахме от тази информация, за да представим в по-компактен и по-лесно обозрим вид лексикалния фонд на паметника и преводните корелати, а също и от съображения за обема на индексите. Избраните от нас принципи и конкретни правила са подробно описани в раздела „Лексикографска концепция“, но тук ще изтъкна основните недотам традиционни решения. За разлика от обичайната практика словоуказателите да отразяват състоянието само по един източник за изходния и целевия текст, в по-редки случаи липсващи части в основния текст да се допълват по други извори[36] или разночетения да се привличат само в случаи на явни грешки[37], речниците към УЕ се опират на цялата славянска ръкописна традиция на сбирката, представена в изданието на М. Тихова, и на огромен брой византийски свидетели, които до момента нямат критично издание, а това беше и най-голямото предизвикателство в процеса на работа[38]. Чрез многобройни възстановени четения и кръстосани препратки между еднакво възможни варианти от източниците – както славянски, така и гръцки, е направен опит за максимално доближаване до първоначалния превод[39]. Възприета е също така относително рядката лексикографска практика за означаване на неточни, грешни, възстановени съответствия[40]. Корелациите от биб-

лейски цитати се маркират шрифтово, за да може да се проследят евентуални тенденции в избора на съответствия. Обратните речници включват и честота на лексемите, за да се улеснят по-нататъшни изследвания в областта на словообразуването[41], като наличието на гръцки обратен речник е, доколкото ми е известно, новост в палеославистичната лексикография.

През тези четири години екипът бе подпомаган по различни начини от редица колеги и институции. Преди всичко трябва да изтъкнем подкрепата от Фонд „Научни изследвания“ и да благодарим на анонимните рецензенти, оценили проекта като достоен за финансиране. Непрекъсната логистична помощ получавахме от Института за балканистика с Център по тракология при БАН в лицето на неговия директор проф. Румяна Прешленова и служителите от административно-финансовия отдел (Галина Терзийска, Даница Илиева и д-р Ели Филипова), които с отзивчивост и компетентност осигуриха протичането на проекта. За предоставените изворови материали сме признателни на Хилендарската изследователска библиотека в Кълъмбъс (Охайо) и специално на Мери Алън Джонсън (Паша), а също на Отдела за ръкописи и старопечатни книги на Австрийската национална библиотека. Ценен начален тласък в издирванията на гръцките извори за УЕ даде възможността за експертен достъп до дигитализираната микрофилмова сбирка на Института за новозаветни текстови проучвания в Мюнстер, предоставена ни от неговия директор проф. д-р Холгер Щрутволф. Оценяваме жеста на г-н Димитър Радичков, директор на Издателството на БАН „Проф. Марин Дринов“, който даде съгласие за отпечатването на тези томове в най-авторитетното научно издателство в България.

От името на целия екип отправям сърдечна благодарност към колегите, които на различни етапи от нашата работа споделиха с нас опит и време, за да подпомогнат изпълнението на нашия замисъл. Ще ги изброя с надежда да не пропусна някого. При първоначалното обсъждане на лексикографската концепция за речниците получихме полезни съвети от проф. Мария Спасова, проф. Елка Мирчева, проф. И. Христова-Шомова, проф. Явор Милтенов, доц. Анета Димитрова, доц. Татяна Илиева, доц. Камен Димитров, д-р Цветомира Данова и д-р Иван Илиев. Колегата Красимир Иванов, лектор по латински език в Оксфорд, пожертва от времето си, за да заснеме по време на пандемията през 2020 г. обемния ръкопис Auct. T.I.4 от сбирката на Бодлеанската библиотека. Консултациите от Милена Евтимова допринесоха за формалното изглаждане на библиографията. Сърдечно благодарим на проф. Роланд Марти за отделеното време за преглед на томовете в почти завършен вид и ценните коментари и съвети, спомогнали за тяхното окончателно прецизиране. Задължени сме на научните рецензенти на двата тома – проф. Искра Христова-Шомова, проф. Елка Мирчева, проф. Веселка Желязкова и доц. Анета Димитрова за високата оценка на нашата работа и за направените бележки, с които, доколкото бе възможно, се съобразихме.

[41] Подобно решение има в речника към *Книга на пророк Иезекиил* (Илиева 2013).

Постарахме се в тези речници да систематизираме лексикографски стари и нови знания за знаковото *Учително евангелие* на Константин Преславски. В процеса на работа имахме изключителния професионален шанс да надничаме в творческата лаборатория на великия старобългарски преводач и автор, да се възхищаваме на умението му със средствата на един млад книжовен език с едва тридесетилетна традиция да предаде на своето неотдавна покръстено паство витиеватата мисъл на църковните отци, изразена чрез усъвършенствания в течение на повече от хиляда години гръцки от византийската епоха. Оставаме с надеждата, че изработените от нас двуезични словоуказатели ще помогнат на научната аудитория също да усети филологическия подвиг на Методиевия ученик и ще подтикне съвременни и бъдещи колеги към неговото всестранно и задълбочено изследване.

Преглед на източниците

А. За старобългарския текст

(S) Синодален препис – Държавен исторически музей в Москва, Син. 262, руски[1], посл. четв. XI – нач. XII в.[2] или след средата на XII в.[3], 256 л., пергамент, две колони[4]. Текстът на *Учителното евангелие* е разположен на л. 1r-37v. Използван е главно по изданието на М. Тихова (2012). Взети са предвид корекциите от В. Криско[5] и са извършвани проверки по дигиталното копие, достъпно на адрес: <https://t.ly/38BJO>.

(G) Гилфердингов препис – Руска национална библиотека в Санкт-Петербург, Гильф. 32, сръбски, 1286 г.[6], 179 л., пергамент (л. 1-162) и хартия (л. 163-179), две колони. Текстът на *Учителното евангелие* е разположен на л. 1-162. Използван е главно по разночетенията в изданието на М. Тихова (2012), но са извършени проверки и допълнения по дигиталното копие, достъпно на адрес: <https://t.ly/siVYR>.

(W) Виенски препис – Австрийска национална библиотека във Виена, Cod. Slav. 12, сръбски, XIV[7], 265 л., пергамент (л. 1-165) и хартия (л. 166-265), две колони. Текстът на *Учителното евангелие* е разположен на л. 166-265. Използван е главно по разночетенията в изданието на М. Тихова (2012), но са извършени проверки и допълнения по дигиталното копие, изработено за проекта в Сбирката за ръкописи и старопечатни издания на библиотеката. Наскоро то бе публикувано на сайта на библиотеката на адрес: <https://t.ly/3QR_J>.

(H) Хилендарски препис – Хилендарски манастир на Света гора, ръкопис № 385, сръбски, 1344 г.[8], 129 л., пергамент. Използван е главно по разночетенията в изданието на М. Тихова (2012), в което са включени и тези от липсващия в кодекса лист, идентифициран като л. 1 от ръкопис РНБ, F.п.I.89. Извършени са проверки и допълнения по дигиталното копие, предоставено ни от Хилендарската изследователска библиотека в Кълъмбъс (Охайо), което е изработено по микрофилм с влошено качество, заснет през 70-те години на миналия век за Конгресната библиотека във Вашингтон с разрешението на монасите от манастира.

[11] „Надградени върху основните форми пълни катени“ – пълните катени към трите Евангелия от тип А, при които базовият коментар на съответната основна катена (catena prima или „Grundform“ („основна форма“) по Ройс) е допълнен с множество схолии и придобива формата на същинска катена.

1.1.2. (Cs) Допълнения и разночетения (Supplementum et varietas lectionis) към двата тома, които Дж. Крамер прави въз основа на ръкописите от Бодлеанската библиотека Auct. T.I.4 и Laud. 33, свидетели на разширените основни форми на катените от тип А към Матей, Лука и Йоан (*catenae primae auctae* или „die erweiterten Grundformen“[13] – *CPG C110.2, CPG C130 [ClaCla C130.2], CPG C140.2).*

1.2. По ръкописи

Тъй като в *Учителното евангелие* не са превеждани пълните катени към Матей, Лука и Йоан от тип А, преводът на места се различава от публикувания от Крамер текст. Съответната лексика бе открита и почерпена от ръкописни свидетели на действителните източници на Константин Преславски – *основните форми на катените от тип А* към Евангелията от Матей, Лука и Йоан (*catenae primae* или „die Grundformen”[14] – CPG C110.1, CPG C130 [ClaCla

тома Geerard, Noret 2018) е възприета класификацията на Ройс, по отношение на катените към Лука има големи разлики. Под обозначението „Typus A /C130“ са включени основната форма, съкратената и разширената основна форма от тип А, различени от Ройс. Идентифицираната от него пълна катена към Лука от тип А в CPG е определена като „Typus B/C131“. През 2023 г. в онлайн версията Clavis Clavium (ClaCla) катената към Лука от тип А (CPG C130) получи нови обозначения и бе разделена на същите четири подтипа, както и катените от тип А към Матей (CPG C110) и Йоан (CPG C140): *catena prima* „die Grundform“ (CPG C130.1, преди Typus A/ C130), *catena prima aucta* „die erweiterte Grundform“ (CPG C130.2, преди Typus A/ C130), *catena prima abbreviata* „die gekürzte Grundform“ (CPG C130.3, преди Typus A/ C130), *catena integra* „die auf der Grunform aufgebaute volle Katene“ (CPG C130.4, преди Typus B, C131) <https://clavis.brepols.net/clacla/OA/Details.aspx?id=E95B93E9312145599F947CB89A015431>. За по-голяма яснота тук са дадени обозначенията и според печатната, и според онлайн версията.

[13] „Разширените основни форми“ по класификацията на Ройс – развитие на основните форми на катените от тип А към трите Евангелия, в чийто базов коментар са вмъкнати допълнителни схолии на един или двама автори.

[14] Терминът *Grundformen* („основни форми“) се използва в класификацията на Ройс. Основните форми на катените от тип А към Матей и Йоан всъщност представляват съкратен вариант на хомилиите на Йоан Златоуст към двете Евангелия. Основната форма на катената от тип А към Лука е свързан анонимен

130.1], CPG C140.1). Ръкописите, свидетели на *разширените основни форми на катените от тип А* към трите Евангелия (*catenae primae auctae* или „die erweiterten Grundformen“ – CPG C110.2, CPG C130 [ClaCla C130.2], CPG C140.2), също бяха взети под внимание, тъй като в тях текстът на основните форми остава почти непроменен. Ръкописът на Крамер, Paris. Coisl. 23, представител на *пълните катени*, бе консултиран заради множеството грешни разчитания на Крамер, а също така бяха направени справки и в неговия протограф, Paris. Coisl. 195, който в някои случаи дава по-добри съответствия спрямо старобългарския превод, потвърждавайки четенията на основните форми/разширените основни форми. Ръкописът от Ватиканската библиотека, Vat.gr.1611, запазил *Катената на Никита Ираклийски* (Catena in Lucam Typus F, CPG C135), дава релевантни четения в рамките на слова 3 и 42.

Лексикографска концепция

1. Насоченост и обхват на речниците

Двуезичните речници са съставени въз основа на съхранената текстова традиция на *Учителното евангелие* на Константин Преславски като цялостна сбирка и неговите гръцки извори – както отдавна известните, така и новооткритите. Тяхната цел е да представи в пълнота словното богатство на паметника, доколкото е възможно най-близо до неговия първоначален текст. Затова данните от славянските и гръцките източници се съпоставят и оценяват критично, за да се отстранят поне част от наслоените в процеса на битуване грешки и отклонения.

В старобългарско-гръцкия индекс са включени всички пълнозначни и непълнозначни думи, за чието присъствие в първоначалния текст на паметника свидетелстват четирите негови пълни преписа. Добавен е и лексикалният материал от по-обемни откъси, намиращи се само в два от тях – Виенския и Гилфердинговия, защото не може със сигурност да се отхвърли тяхната принадлежност към оригиналния Константинов текст. Старобългарско-гръцкият индекс съдържа общо 3806 лексеми, засвидетелствани в 50 668 словоупотреби – 48 785 от основния текст и още 1893 от взети предвид варианти от трите южнославянски преписа. Още 37 са числовите означения.

Гръцко-старобългарският речник е съставен въз основа на старобългарско-гръцкия, което автоматично изключва от него всички словоупотреби без старобългарски корелат без някои случаи, описани по-долу в раздела за лексикално-граматична асиметрия. Затова неговият обем е по-малък – наброяват се общо 3328 лексеми в 38 774 словоупотреби – 30957 от основния източник и 7787 от допълнително привлечените паралелни текстове.

2. Източници

2.1. За старобългарския текст

Макар преписи на отделни слова от сбирката да се разпространяват в различни типове сборници[1], предлаганите речници обхващат данните само от четирите пълни преписа на УЕ, защото те представят единна текстова традиция[2].

2.1.1. Основен източник е Синодалният препис (ГИМ Син. 262) от посл. четв. XI-нач. XII в. или след средата на XII в.[3], използван главно по изданието на М. Тихова[4] и отбелязван в представените речници със сигла S. Зачетени са коректурите към него, направени от В. Криско[5] и Е. Блахова[6], а на редица места са извършени уточнения и допълнения по дигиталното копие, достъпно на сайта на Руската държавна библиотека[7]. В изданието на М. Тихова частите от слова 1 и 2, които липсват поради механична загуба в Синодалния ръкопис, са допълнени по Виенския препис, съхраняван в Сбирката на ръкописи и старопечатни издания на Австрийската национална библиотека (ÖNB Cod. Slav. 12).

[1] Проучванията на А. Турилов (1999), М. Спасова (2004, 2014, 2015, 2016), К. Иванова и Ц. Данова (2022) въвеждат в науката пет самостоятелни преписа на 1-во слово, по един на 2-ро, 3-то, 14-то, 18-то, 27-мо, 46-то, 48-мо и 49-то, по два от 45-то и 47-мо. Азбучната молитва заедно с Пролога към Евангелието има един общ препис, а отделно – още 43 преписа, които са най-пълно систематизирани у Veder 1999: 16-17. Напоследък бе изказано предположение, че всички нейни преписи са зависими от Синодалния (Dikova 2022, Fuchsbauer 2023), а най-актуалното ѝ проучване е на Р. Марти (2024).

[2] Тихова 2004. Текстологичните наблюдения на М. Спасова върху словото с най-много преписи – първо – ясно показва, че несистемни и непоследователни редакторски намеси се наблюдават в преписите, които се разпространяват самостоятелно в различни типове сборници, а не в рамките на комплекта (Спасова 2016: 192).

2.1.2. Като допълнителни източници са използвани трите пълни преписа, включени като разночетения в изданието на Тихова: споменатият Виенски препис, Гилфердинговият от 1286 г., намиращ се в Руската национална библиотека в Санкт-Петербург (РНБ, Гильф. 32) и Хилендарският от 1344 г. от едноименния светогорски манастир (Хил. 385)[8]. В процеса на работа за определени четения бяха извършени допълнителни консултации по дигиталните копия на тези ръкописи: на Виенския препис, подготвено за нашите нужди от Австрийската национална библиотека; на Гилфердинговия, достъпно на сайта на РНБ[9]; на Хилендарския, предоставено ни безвъзмездно от Хилендарската изследователска библиотека в Кълъмбъс (Охайо)[10].

2.2. За гръцкия текст

Привлечени са няколко типа източници – катени, хомилии, гръцки Стар и Нов завет.

2.2.1. Основен източник за съответствията от катенния текст е изданието на Дж. Крамер[11], изготвено по ръкописа от Националната библиотека на Франция Coislin 23 (свидетел на пълните катени от тип А към евангелията от Матей, Йоан и Лука). В процеса на работа бяха поправени множество грешни разчитания в изданието, а също словораздели и непоследователности в изписванията (напр. ὅτ᾽ ἄν и ὅταν, εἴτις и εἰ τις, καίτοιγε и καίτοι γε). Почти всички паралели от основния текст в двутомната публикация на английския учен са препечатани в изданието на М. Тихова, а голяма част от успоредиците в суплементумите към двата тома, които не са използвани от нея, са посочени в рецензията на В. Криско[12]. Липсата на съвременно

[10] Дължим специална благодарност както на монасите от манастира, дали навремето съгласие за филмиране на ръкописа, така и на Мери Алън Джонсън (Паша) от Хилендарската изследователска библиотека в Кълъмбъс (Охайо), която подготви за нас дигиталната версия на микрофилма.

критично издание на действителните източници на УЕ – основните катени от тип А към трите евангелия – до голяма степен бе компенсирана от работата на византинистите в екипа с над 40 катенни ръкописа, подробно описани в раздела „Преглед на източниците“. Повечето са използвани в дигитален вид през сайтовете на няколко библиотеки – Париж, Мюнхен, Ватикана, Атина, Флоренция, Оксфорд и други, или на Института за новозаветни текстови проучвания в Мюнстер. По снимки, направени от Красимир Иванов, бе проучен кодекс Auct. T.I.4, а *de visu* и по лични снимки на Д. Котова – ръкопис Cl. I. 34 от Библиотека Марчана във Венеция.

2.2.2. Изследванията на Д. Котова[13] и И. П. Петров[14] разкриха, че Константин Преславски е използвал не само византийски катени, но и директно хомилиите на Йоан Златоуст към евангелията от Матей и Йоан, както в централните части, така и в някои заключения. Паралелите за съответните места са по изданието на Мин[15].

2.2.3. Внимателното вглеждане в оригиналните Константинови текстове показа, че те изобилстват от точни или приблизителни цитати от Новия, но и от Стария Завет. Затова бяха привлечени паралели и от Септуагинта по изданието на А. Ралфс, преработено и допълнено от Р. Ханхарт[16], и Новия Завет по изданието на Нестле и Аланд[17]. За библейските цитати гръцките корелати се посочват по източника, който е превеждан – катени или хомилии, а в случаите, когато те не присъстват в него или се намират в оригинални Константинови части – по цитираните издания на Стария и Новия Завет. Това означава, че когато в тълкувателните части текстът на цитат или на част от него липсва в превежданата катена към Матей и Йоан, съответствието се взема от хомилиите на Златоуст (PG 57, 58, 59), а ако и в тях той не е наличен – от текстовете на Новия и Стария завет. В случаите, когато е превеждана катената към Лука, липсващите цитати или части от тях се успоредяват с текста по изданията на Новия и Стария

завет. Произходът на съответствията се отбелязва с приетите сигли на източниците.

2.2.4. Ако цял пасаж се намира само в допълнителните извори – суплементумите към двата тома в изданието на Крамер (Cs), Златоустови хомилии (Ch), Септуагинта (Se) или Нов Завет (Nt), а в него само отделна дума от славянския текст няма съответствие, при съкращението om. се изписва източникът, откъдето е паралелът на откъса.

3. Лексикографски подбор и вмешателство

3.1. Както беше споменато, основен източник е Синодалният препис, но в редица случаи в него, а също и в останалите преписи, при възпроизвеждането са допуснати грешки или промени, които нарушават смисъла на текста. За да не попадат в речника думи, които по всяка вероятност не са присъствали в първоначалния текст на сбирката, си позволихме следните вмешателства:

3.1.1. Преписваческите грешки, забелязани от М. Тихова и маркирани в нейното издание с (!), независимо дали са присъщи само на Синодалния препис или и на други(те) източници, са взети предвид и словоупотребите са лематизирани с оглед на правилното четене. При необходимост корекцията е отразена в приложения списък „Корекции към изданието на Учителното евангелие и възстановени четения“. Напр. в изданието на с. 106 (л. 48c21-d1) стои кънникы(!), вм. правилното книгы, което е засвидетелствано в трите южнославянски преписа за гр. γραφῆς. В речника се лематизира кънигъ без допълнителни разяснения. Обаче записът вѫгь(!) на с. 19 (л. W168a25 – в допълнението по Виенския препис поради механичната загуба в Синодалния) не е така прозрачен поради разночетенията тварьдь G и вѫлгь H. Затова той е включен в списъка с коректури, а употребата се подрежда под лема вѫхъ, тъй като това е логичното съответствие на гръцката дума κορυφός.

3.1.2. Доколкото е възможно, бяха отстранени непоследователностите в словораздела, посочени от В. Криско[18]. В редица случаи, за кои-

[18] Вж. Крысько 2017: 54-55.

то палеославистичната традиция не е единна (напр. по ѹьто / поѹьто, изписването на частицата же), словоразделът бе съобразяван с гръцкия паралел или бе избран единен вариант, напр. въслѣдъ (за адвербиализирането му говори изразът въслѣдъ мене), ꙁапрьва (отразено като наречие в SJS), въ простѫ. Това редакторско вмешателство обаче няма претенцията да е изцяло последователно.

3.1.3. Направените от В. Криско коректури към разчитането или словораздела и поясненията към изданието са взети предвид. За улеснение на ползвателите, а и за избягване на недоразумения при сравнение с издадения текст, те са включени в приложения списък „Корекции към изданието на Учителното евангелие и възстановени четения“, като след локацията е добавена в скоби буква „К“. Другите използвани за целта публикации се цитират на съответните места. Липсата на указан източник за поправката означава, че тя е от авторите на този речник. За да се избегнат излишни пояснения, при коректури на словораздела се изписва само правилният израз, като в сив фон е отбелязана промяната. При възстановените четения се дава кратка информация за мотивите. Корекциите в разчитането на отделни букви от ръкописа се маркират с получер шрифт и подчертаване с двойна линия. Ето няколко примера:

18c10-11 (K) мноꙗдениѥ (това означава, че се лематизира многоꙗдениѥ, а не мъногъ и ꙗдениѥ)

W169a21* (K) прьвѣнцн lege прьвѣнцн = πρώτην, cf. прьвѣнꙋцн G прьвѣѥ H (лематизира се прьвѣнцн, а не прьвѣньць)

9a7* (K) нѣсть lege н ꙗсть, cf. н ꙗсть WGH (лематизира се н conj. и ꙗстн, а не нѥ и бытн)

22a2* сътрнтн lege съмотрнтн = σκοπῆσαι, cf. смотрнтн WGH (лематизира се съмотрнтн, а не сътрнтн)

30d19* а̏пл҃н lege а̏ггл҃н = Ἄγγελοι, cf. а̏ггл҃н H а̏нг̏л҃н W а̏гл҃н G

7b21-7c1 (K) т**оп**леменьнцн

3.1.4. Работата на екипа със славянските преписи и далеч по-богата гръцка изворова база даде основание в единични случаи за отхвърляне или прецизиране на някои от посочените от Криско и Молков[19] незасвидетелствани думи. Аргументите са представени на съответните места в списъка, а словоупотребите са лематизирани според възстановената форма със звездичка към локацията. Напр. вместо поставената под въпрос от двамата автори лема ознатн?[20] от озна л. 180d5 поради наличие на изправно четене позна в трите южнославянски преписа се лематизира позната; вариантът оубѣдитн в останалите три преписа срещу оувѣдитн (!) на л. 75b20 в S свидетелства за грешка на кописта и затова лемата е оубѣдитн, а не предложената оувѣдитн[21]; боуреватн 83b5 е от боуреватн сѧ, а не от боуреватн[22], защото в гръцки стои медиопасивната форма κλυδωνίζεσθαι, която е предадена чрез страдателен залог със сѧ, съхранен в трите южнославянски преписа като боуреватн сѥ.

Няколко корекции в словораздела или възстановени форми, отбелязани в рецензията на В. Криско, бяха отхвърлени. Напр. вместо корекцията дотоу на л. 175a16-17[23] в речниците се лематизира изразът до тоу, както е в изданието на Тихова, защото съответства на μέχρι τούτου; предложената възстановка снко за снукѣ(!) на л. 50c19[24] изглежда по-малко вероятна, отколкото наречието снцѣ с оглед на разночетенията на снцѣ WH снцѥ G[25] и гръцкото съответствие οὕτως.

3.2. Вариативни четения.

3.2.1. В славянския текст.

Подборът на разночетенията от трите южнославянски преписа, които се включват в речника, почива на основната цел за максимално доближаване до първоначалния Константинов текст.

[23] Крысько 2017: 55.
[24] Крысько 2017: 58.
[25] Срв. апарата у Тихова 2012: 110.

3.2.1.1. Не са обработени литургическите указания от южнославянските ръкописи, защото те не са част от същинския текст на УЕ (не са генетично свързани с него), а както показват последните изследвания на К. Ханик[26], са добавени по-късно с прагматична цел. Отразени са обаче вариантите към заглавията на словата с указания за евангелско четиво, жанрова и авторска атрибуция.

3.2.1.2. Вариантите, които с оглед на гръцкото съответствие за преводните части и с оглед на общия смисъл за оригиналните са еднакво допустими в дадения контекст, се представят като равностойни с кръстосани препратки помежду им. Напр.: анг҃лъ S 4/14d2 и вариантът а҃нгльскь G са еднакво възможни като съответствие на гр. τῶν Ἀγγέλων и затова присъстват в речника; същото се отнася и за балоүюще S 32/145d6 и врачоүюще GH за гр. θεραπεύοντες. Ето как изглежда корелацията в речника:

балованъ (1)
- θεραπεύω (1): 32/145d6 » [врачеватиᴳᴴ]

врачеватиˇ (1[var])
- θεραπεύω (1): 32/145d6ᴳᴴ » балованъ S

θεραπεύω (26 + 4[var])
- балованъ (1): 32/145d6 » [врачеватиᴳᴴ]
- врачеватиˇ (1[var]): 32/145d6ᴳᴴ » балованъ S

3.2.1.3. Случаите, в които четенето по Синодалния препис е по-неточно от варианта по други преписи, но не са коригирани според останалата традиция и не присъстват в списъка с коректури, се отразяват по същия начин, като се въвежда и съответен знак. Обикновено се посочва и вариантът, независимо дали е по-добър или също така неточен, напр.: ≈ равьноүьстьно S 7/45c11 (преосмислено като наречие в израза ѥже велико равьноүьстьно ѩвлѧеть) и равноүьстые G, равноүьстиѥ W за ἰσοτιμίαν; # апостолъ S 47/214d9 и точен корелат евангелиѥ WGH за Εὐαγγέλιον (защото в контекста става дума за цитиране на Евангелието и „апостол“ е допустим вариант); ≠ пр҃ър҃ъкатель S 34/156d12ᵂᴳ и # плакатель WG за αὐλητής; ≠ блнжнүьство S 38/171d2 и ≠ блнжьство WG за χρόνος.

[26] Ханник 2024.

3.2.1.4. По-обемните откъси, които присъстват във W и G, но липсват в другите два преписа, са включени в речника (вж. по-долу за адреса, който те получават).

3.2.1.5. Не се лематизират варианти от трите южнославянски преписа, които:

а) са характерни за развоя на сръбския език, напр. вπрашахоү W срещу въпрашахоү S – лематизира се само въпрашатн; оүносить H вьносить WG – лематизира се само въноситн;

б) не отговарят на гръцкия източник, дори ако са представени в повече от един препис: слышал W слышань G слыша H за τὸν λόγον = слова S 5/23d1 – в речника попада само правилното четене от S.

3.2.2. В гръцкия текст

Привличането на множество гръцки ръкописи даде възможност не само да се прецизират редица четения в изданието на Крамер, но и да се обогати представата за вариативността във византийската традиция. За да се разкрие възможно най-близкият до Константиновия източник текст, бяха приети следните решения.

3.2.2.1. Ако четенията в основния текст по Крамер и в допълнителните източници са равностойно адекватни на превода, се лематизират и двете с кръстосани препратки помежду им. Напр. своѥю 5/28c18 може да съответства и на τῆς ἰδίας от основния текст по Крамер, и на τῆς οἰκείας от Златоустовата хомилия, затова и двете лексеми попадат в речниците с указание след сигнатурата за варианта в другия източник. Ето как се отразява това в речниците:

ἴδιος (17 + 1[var])
- свон (10): .... 5/28c18 » {οἰκεῖοςᶜˢ}; ...

οἰκεῖος (13 + 2[var])
- свон (13): ...; 5/28c18ᶜˢ » ἴδιος C

свон (282 + 10[var])
- ἴδιος (9 + 1[var]): ...; 5/28c18 » {οἰκεῖοςᶜˢ}; ....
- οἰκεῖος (11 + 2[var]): ...5/28c18ᶜˢ » ἴδιος C; ...

3.2.2.2. Ако дадено четене не съответства на преводния корелат, независимо в кой гръцки източник се намира, то не се лематизира,

за да се избегнат препратки към неадекватни варианти, които биха натоварили излишно речниците. Така информацията дали на даденото място в основния текст на Крамер думата липсва изобщо или просто тя не отговаря на старобългарския текст, се загубва, но винаги може да се направи справка в изданието на М. Тихова.

4. Структура на речниковите статии

4.1. Основна схема

4.1.1. Старобългарско-гръцкият речник включва следните данни:

а) Старобългарска лема (при омоними се добавят уточняващи характеристики), честота в текста, като поотделно са сумирани появите в основния източник и в разночетения, отбелязани с ^{var} след цифрата, напр. **бєсѣдовати** (46 + 1^{var}).

б) Гръцки корелати в основна речникова форма в следния ред: първо еднословни – точни, контекстуални (#), свободни (≈), неточни или грешни (≠), следват фразови съответствия, гръцки граматични мотивации за славянската лексема (напр. dat., gen., gramm.), липси при наличен паралелен текст (om.), липси на гръцки паралел за целия откъс, т.е. оригинален Константинов текст (Ø). Ако има подлеми за различни подкласове в парадигмата на славянската лексема или за словосъчетания с нея, те се представят след корелатите за основната лема. Редът в рамките на групите е азбучен.

в) Брой употреби на гръцкия корелат за съответната славянска дума, също с отделно изчислени появи в основния източник (C) и в разночетенията (Cs, Ch, Se, Nt, ръкописи), напр. διαλέγομαι (25 + 2^{var}) за бєсѣдовати.

г) Адрес на словоупотребите – състои се от пореден номер на словото, а след наклонена черта се указват лист, колона и ред по Синодалния препис, напр. 1/6d3. Възстановените по Виенския препис механично загубени части от 2-ро и 3-то слово, включени в основния текст на изданието на М. Тихова, получават сигла W преди съответния лист, напр. 2/W167d33. Словоупотребите от по-обемните пасажи от Виенския и Гилфердинговия препис, които се размина-

ват с текста по Синодалния и Хилендарския и са представени в критичния апарат към слова 13, 24, 37, 38, 46, 47 и 48, са маркирани със сигла GW и пояснение add към локацията на словоупотребите по Виенския препис, напр. 37/GW235b6add. Адресите на думи от библейски цитати са откроени с получер курсив, напр. ***12/67a6.*** Добавена звездичка към адреса на дадена употреба сигнализира, че тя е възстановено четене, описано в приложения списък „Корекции към изданието на Учителното евангелие и възстановени четения“, напр.: ѡлѣзньнъ – ἐπίπονος 5/30b5*. При адреса на фрази звездичката указва, че поне една от участващите думи е възстановена.

Когато дадена словоупотреба е засвидетелствана в допълнителните източници – съответно W, G и H за старобългарския текст или суплементумите към изданието на Крамер, катенни ръкописи, хомилиите на Йоан Златоуст или библейски цитати в оригинален Константинов текст, локацията по S получава допълнителна сигла (срв. списъка на източниците), напр. 1/W168c7^{Cs}; 36/167d17^{WGH}; ***6/31d16***^{Se}. В някои случаи, за да се избегнат дълги редици от сигли на преписи, се използват общи означения за основните текстологични групи. Със сигла **Kp** се маркира групата на основните форми на катените от тип A (*catenae primae*) към евангелията от Матей, Лука и Йоан. Нейната поява означава, че съответното четене е засвидетелствано от всички или повечето от привлечените преписи на съответните катени за даденото слово. По аналогичен начин **Ka** замества сиглите на разширените основни форми на катените от тип A (*catenae primae auctae*) към трите евангелия. Информацията за проучените за всяко слово ръкописи и за катените, които те представят, е систематизирана в таблица „Използвани гръцки източници за отделните слова в *Учителното евангелие*“, приложена в края на раздел „Преглед на източниците“. Ако сигнатурата на дадена словоупотреба съдържа сигли и за славянски, и за гръцки допълнителни източници, те се разделят с дефисно тире, като на първо място са славянските, напр.: слава – δόξα 24/122b3$^{WGH\text{-}Ch}$ » om. S.

Повторна употреба на дадена славянска лексема на един и същ ред се бележи с долен индекс $_2$, $_3$ и т.н., напр. н – καί 25/125a15^{Ch}, 25/125a15$_2$. Идентична гръцка дума на същия адрес получава индекс $_β$,

съответно следващи появи се индексират с $_{\gamma, \delta}$ и т.н., напр. αὐτός – сѧмъ 1/6d3, но н pron. 1/6d3$_{\beta}$. При единични думи адресите включват само реда, на който лексемата започва, при фрази – начален и краен ред.

д) Подлеми за граматични пояснения, словоформи или словосъчетания се въвеждат само при нужда (вж. подробно по-долу), а съответствията им се представят по описания ред.

4.1.2. Гръцко-старобългарският речник включва:

а) Гръцка лема (при омоними се добавят уточняващи характеристики); честота в текста (поотделно за основен текст и за включените в речника варианти).

б) Лематизирани старобългарски съответствия в следния ред: първо еднословни – точни, контекстуални (#), свободни (≈), неточни или грешни (≠), следват фразови съответствия, славянски граматични транспоненти (instr., gramm. и др.). Ако има подлеми за различни подкласове в парадигмата на гръцката дума или за словосъчетания с нея, те се представят след корелатите за основната лема. Редът в рамките на групите е азбучен.

в) Брой употреби на славянския корелат за съответната гръцка дума, също изчислени поотделно за основния източник и привлечените разночетения.

г) Адрес на словоупотребите по описания за старобългарско-гръцкия индекс модел.

д) Подлеми за граматични пояснения, словоформи или словосъчетания, въведени при нужда (вж. по-подробно в следващия раздел).

4.2. Асиметрични случаи

Понякога паралелите между гръцки и славянски текст не могат да се изразят чрез еднословни корелати. По-надолу са разгледани основни случаи на асиметрия между изходния и целевия език и начините на тяхното представяне в речниците. За удобство примерите са групирани в раздели – количествена, лексикално-граматична и семантична асиметрия, но понякога те ги съчетават.

4.2.1. Количествена асиметрия.

4.2.1.1. В индексите като леми са включени само лексикалните членове на опозицията. В преводните части липсата на съответствие се бележи с om. Съкращението се използва и за думи в старобългарския текст, които нямат лексикален корелат в гръцкия, но са мотивирани синтактично – напр. срещу ли във въпросителни изречения или ни в изрази с двойно отрицание стои гръцко съответствие om. При липса на славянско съответствие за дадена гръцка дума, тя не присъства и в двата индекса. Същото се отнася за употреби на ἄν, които нямат нито лексикален, нито граматичен еквивалент. Знакът Ø стои вместо гръцки паралел срещу лексеми от оригиналните части.

4.2.1.2. Когато една дума от старобългарския текст отговаря на две и повече от гръцкия или обратно, а също и когато две или повече от старобългарския предават две или повече в гръцкия, съответните словосъчетания се въвеждат като подлеми към всяка от лемите. Напр.

велчꙋанниѥ (9)
- ἡ ἠρμένη ὀφρύς → αἴρω & ὀφρύς (1): 32/145b11

αἴρω (12 + 5^{var})
| ἡ ἠρμένη ὀφρύς (1)
- велчꙋанниѥ (1): 32/145b11

ὀφρύς (1)
| ἡ ἠρμένη ὀφρύς (1)
- велчꙋанниѥ (1): 32/145b11

влѣщи (6)
| влѣщи по себѣ (1)
- ἐπισύρομαι (1): 16/81b17-18

бꙑвати (65 + 2var)
| достоинъ бꙑвати (1)
- ἀξιόομαι → ἀξιόω (1): 32/145c11-12

достоинъ (22)
| достоинъ бꙑвати (1)
- ἀξιόομαι → ἀξιόω (1): 32/145c11-12

ἀγριαίνω (1)

- свѣрѣпъ бꙑвати (1): 20/102b2

Ако всяка дума от гръцкия текст има точен корелат в старобългарския, те се дават поотделно, независимо дали в други случаи образуват фраза – напр. понмъ и творитн от израза понмъı творѧхоу 19/19b3-4, който стои срещу ἔγκλημα ἐποιοῦντο, са представени самостоятелно, а понмъı творѧще за ἐγκαλεῖν 21/108b18^{Ch} – като фраза понмъı творитн.

4.2.2. Лексикално-граматична асиметрия

Ако граматична категория в гръцки е преведена лексикално, корелацията се представя само в старобългарско-гръцкия речник и обратно – гръцки словоупотреби с граматичен еквивалент в старобългарския текст, присъстват само в гръцко-старобългарския речник. Ето някои типични случаи.

4.2.2.1. Употребите на бꙑти за образуване на аналитични глаголни форми, а също и на имѣти и хотѣти, когато нямат лексикален корелат, а само граматична мотивация в гръцки, се обособяват в самостоятелна подлема с означение gramm., на което съответства също gramm. в гръцки, напр.:

бꙑти (1726 + 34^{var})
| | gramm. (318 + 5^{var})
- gramm. (252 + 48^{var}): ...

4.2.2.2. Понеже предаването на гръцки предлог със славянски беспредложен падеж има връзка със семантиката на предлога, а и тези корелации са значими за изследване на преводаческата техника, те присъстват в гръцко-старобългарския речник, като за славянски транспонент на гръцката дума е посочен съответният падеж, напр.:

ὑπό (36 + 5^{var})
| ὑπό + gen. (31 + 4^{var})
- instr. (28): ...

4.2.2.3. Ако на лексема от единия език съответства само определен подклас на лексемата в другия, той се обособява в подлема. Най-често граматична форма в гръцки е предадена със словообразувателен

формант в старобългарски, който изменя морфологичната категория на изходната дума.

сельнъ (2)

- ἀγρός gen. (1 + 1^{var}): 11/64a20; 11/65a10^{KpKa}

ἀγρός (3 + 4^{var})
....
| gen. (1 + 1^{var})
- сельнъ (2): ***11/64a20***; ***11/65a10***^{KpKa}

гръдость (1)

- ἀκενόδοξον, τό → ἀκενόδοξος (1): 34/157d7

ἀκενόδοξος (1)
| ἀκενόδοξον, τό (1)
- гръдость (1): 34/157d7

свѣрѣпъ (5)

- ἀπηγριωμένος → ἀπαγριόομαι (1): 41/194a10

ἀπαγριόομαι (1)
| ἀπηγριωμένος (1)
- свѣрѣпъ (1): 41/194a10

въскрьсенїе (14)

- ἀναστῆναι, τό → ἀνίστημι (1): 7/43c1

ἀνίστημι (18 + 3^{var})
| ἀναστῆναι, τό (1)
- въскрьсенїе (1): 7/43c1

Типичен пример е и преводът с падежна форма на гръцко наречие, напр.:

волѧ (42)
| волеі҃ (7)
- ἑκουσίως (2): 20/105b20; 31/140d4

Адвербиалните употреби на гръцките прилагателни се отбелязват само в случаите, когато в старобългарския текст стои наречие.

Степенуването на прилагателните по принцип не се отразява, но изключение правят случаите, когато то има лексикален или морфологичен израз в другия език. Тогава се обособява подлема, напр.:

προΐστημι (2)
| προεστηκώς (1)
• старъ comp. (1): 41/193c3

Понякога генитивното отношение в гръцки е по подразбиране, защото името е несклоняемо и липсва членна форма, но подлема gen. се добавя, за да обясни славянското съответствие, напр. нꙁдрaнлнтьскъ 41/194a6 за Ἰσραήλ gen.

4.2.2.4. В единичен случай точката след думата е включена в подлемата – поставнтн· 8/48c2, защото е много вероятно тя да е част от превода на формата ὑποστίξαι (ὑποστίζω в граматиката означава ‘слагам запетая или семиколон’).

4.2.3. Семантична асиметрия

Направен е опит да се разграничат три типа несъответствия в значенията на корелатите, като за всеки от тях са въведени специални знаци.

4.2.3.1. Контекстуален превод. Знакът # се използва при корелати, които не са речникови съответствия, но са допустими по смисъл в дадения контекст, напр. вестьда # πρᾶγμα 3/13a17; богъ # Χριστός 4/19b10; въꙁвѣстнтн ***19/98d16***^{Nt} # διασαφέω; въмѣстнтн сѧ 38/176b13 # εἰμί в текста сѧ въмѣстнлъ за ἐστίν; въпрашатн нскоусьноиѫ мъслнѭ 8/51a17-19 # συλλογίζομαι; въше 31/142a17 # ἔμπροσθεν; вѣра 9/54a13 # ὁμολογία.

4.2.3.2. Свободен превод. Знакът ≈ се използва, когато старобългарското съответствие предава доста свободно смисъла на гръцката дума, но все пак не противоречи на контекста, напр. мнлость 50/226a4 ≈ ἱκεσία; вес троудъ 28/132c15 ≈ ἄκαρπος; вестьдовatн 5/21d10 ≈ διάλεξις (в текста вестьдоующин предава διαλέξεως); вѣсьство 21/108c11 ≈ ἄνοια Ch. Същият знак маркира и разминавания в морфологичния клас на корелатите, напр. веселнтн сѧ 3/13a11 ≈ εὐφροσύνη (глагол срещу съществително). Той не се използва при преход от прилагателно към наречие и обратно, защото това явление е обичайно поради синтактичните функции, които двете категории могат да изпълняват.

4.2.3.3. Грешен превод. Знакът ≠ сигнализира несъответствие между думата в оригинала и нейния корелат в превода, което не може да намери задоволително обяснение, напр. въдаѩтн ≠ ἀνίστημι 2/9a4; прѣвѣкатель ≠ αὐλητής 34/156d12. За грешни съответствия, които обаче са коригирани въз основа на други преписи, гръцки текст или по умозрителен път, се използва знак *, а неговата употреба за възстановени първични четения е описана по-горе.

5. Лематизационни принципи

5.1. За старобългарски

5.1.1. Лемите се дават в основна речникова форма според книжовната старобългарска норма, като се следват основните принципи на *Старобългарски речник* (I: XXVIII-LII) и повечето от тези в *Slovník jazyka staroslověnského*, формулирани от Ф. В. Мареш (XXIX-LXI). Приети са някои отклонения от нормата в СтБР и/или съответно на SJS:

5.1.1.1. Не се използват графични знаци за отбелязване на мекост при веларни съгласни (геона вм. г҆еона) и йотация при сонори (доньдеже вм. доньдеже, въꙁлюбленъ вм. въꙁлюбл҆енъ).

5.1.1.2. Редуцираното н в суфикси се предава с н (моленнıе вм. моленые).

5.1.1.3. Заетите в старобългарски гръцки букви ѳ, ѯ и ѵ се съхраняват в лични и географски имена, защото такава е обичайната им форма в основния ръкопис, а и в повечето преписи. По същата причина и заради установената от SJS лексикографска норма в заемки се запазва ѵ (архисѵнагогъ, мѵро), но не и ѱ (псалъмъ).

5.1.1.4. Само с ѣ се лематизират добродѣтѣль и добродѣтѣльнъ, както е в SJS. Съкратените изписвания бл҆г҃т- / бл҆т҃- се представят под лема блаꙋодѣть. Към този архаичен облик са отнесени и 15-те случая на разгърнато изписване с ѧ в Синодалния препис (блаꙋодят-),

защото в останалите три преписа стои винаги блгодѣт- или съкратено изписване (единственото изключение е в H и съответства на употребата на л. 93c3).

5.1.1.5. Приема се основна форма вънѹаднтн, а не предпочетената в SJS вънадѹнтн, защото това е обликът на глаголната основа не само в Синодалния[27], но и в южнославянските преписи.

5.1.2. Хаплографските изписвания се лематизират поотделно без допълнителен коментар (двете думи в бе-страха, нѣсть и подобни се обработват независимо една от друга).

5.1.3. При дублетни форми, една се приема за основна и към нея се препраща от другата, напр. ннъгда вж. нногда, ноуд- вж. нѫд-, блнзь adv. вж. блнзъ adv., а предлогът блнзъ се дава отделно, както и несклоняемото прилагателно блнзь. Изключения се допускат в някои случаи, за да се запази информацията за местоположението на всяка от употребите и техните гръцки корелати, напр. в отделни леми се представят нздалеча 10/59d8 за πόρρωθεν и нздалече 50/229d3 за ἐκ διαστήματος.

5.1.4. Композита, които се различават само по съединителна гласна, се представят в отделни леми, напр. съмѣромѫдрость и съмѣроумѫдрость, чьстолюбніе и чьстьлюбніе. В някои случаи има привидна непоследователност в словораздела, напр. длъготрьпѣнніе WG и длъго трьпѣнніе S за μακροθυμία, но всъщност корелатите са мотивирани от употребите в текста – съответно дльготрьпѣннѣмь WGH и дълготрьпѣнніемь в S.

5.1.5. Омонимните леми се представят поотделно, снабдени с индекс и смисловразграничителни пояснения – граматична категория или значение, напр. вьсь$_1$ pron. – вьсь$_2$ ‘село’; мнръ$_1$ ‘покой’ – мнръ$_2$ ‘свят’. Като отделни леми се представят и дублетни форми на топоними, напр. нернха, типична за S, и обичайната нернхонъ в останалите преписи; вноьлеемъ и вноьлеома.

[27] Вж. Крысько, Мольков 2017: 387-388.

5.1.6. Лемите на етноними и жителски имена, които не са засвидетелствани в единствено число, се дават в мн.ч.

5.1.7. Съставните лични имена се представят като подлеми към отделните лексеми, напр. ноанъ ѕлатоустъ попада под двете леми[28].

5.1.8. Глаголите с общ инфинитив и различна парадигма в сегашно време се обединяват под обща лема, независимо дали имат видова разлика: нарнцатн за нарнчѫ и нарнцаіѫ; въздвнѕатн за въздвнжѫ и въздвнѕаіѫ.

5.1.9. Формите на глаголите със ѧ – възвратни и за страдателен залог – се лематизират със ѧ, като при необходимост се добавя подлема към гръцкия глагол, за да се обясни корелацията.

глаголатн (450 + 10^{var})

...

| глаголатн ѧ (4)

- λέγομαι → λέγω (3 + 1^{var}): 6/33c17; 7/44c17; 7/46c4; 38/176b4^{Cs}

ἀντέχω (3 + 1^{var})

...

| ἀντέχομαι (3)

- дрьжатн ѧ → дрьжатн (1): 47/214c15

Ако обаче стб. ѧ отговаря на гр. ἑαυτοῦ, то се лематизира отделно под лема себе.

В определени случаи старобългарските форми със ѧ не са мотивирани от пасивни или медиални форми в гръцки и затова се подреждат към основната лема, напр.: постъıдѣтн ѧ стои директно под ἐντρέπω, защото гръцкото съответствие за постъıдıать ѧ 21/108a5 е ἐντραπῶσιν.

По същия начин се постъпва и при глаголи на ѧ, които преважда и активни, и медиопасивни форми, защото очевидно мотивацията не е свързана с гръцкия залог, напр. под корелацията θαυμάζω – чѫдитн ѧ се поместват употребите θαυμάζεται – чѫднмъ [бъıваіе-ть] 49/222a18, ἐθαύμαζον – чоуждахоу ѧ 5/27d13 и ἐθαύμαζον – чюждахоу ѧ 5/27d17.

[28] Вж. Дикова 2024б.

Ако обаче гръцки пасивни и медиопасивни форми се предават както с, така и без ⷭ, тези със ⷭ се обособяват в подлема, за да е видна причината за тях, напр.: μνησθῆς – помѧнешн ***51/237a14***[Nt] и ἐμνήσθη – помѧноуⷭ 18/91b21 със старобългарска лема помѧнѫтн стоят директно под μιμνήσκω, но μνήσθητι за помѧнн ⷭ ***32/147a18*** със старобългарска подлема помѧнѫтн ⷭ → помѧнѫтн се отделя под подлема μιμνήσκομαι.

5.1.10. Ако в текста са засвидетелствани само форми със ⷭ от глаголи, които по правило имат и активни форми, в речника се дава лема само със ⷭ.

5.1.11. Субстантивирани причастни форми, които не могат да бъдат отнесени към съществуващ (засвидетелстван в лексикографската традиция) глагол, подобно на тези, чиито лични форми не са регистрирани с негация, се лематизират самостоятелно: н҃болетѧщнꙗ 40/191c17 се представя под неболетѧн; негъиблемъ S 48/219b8 (с вар. непогыблющь H) за ἀμείωτον съответно под негъиблемъ и непогъиблѧн.

5.1.12. Прилагателните се изписват в проста форма само в м.р. ед.ч. Редните числителни се представят само в сложна форма м.р. ед.ч.

5.1.13. Като отделни леми са представени дериватите със суфикси -енъ и -еньнъ, напр. ненzдреченъ и ненzдрещеньнъ.

5.1.14. Суплетивните форми на прилагателните (напр. болнн) и на личните местоимения за 1 и 2 лице ед.ч. и мн.ч. (ѧzъ, тъı, мъı, въı) се представят в отделни леми.

5.1.15. Наречията в сравнителна степен се дават като самостоятелни леми, тъй като морфологично принадлежат към категорията на неизменями думи, а и защото така се вижда разнообразието в адвербиалните употреби, което понякога дори е обвързано с дадени преписи, напр. лнхо се предпочита в южнославянските WGH, а лнше в руския S: 27/130c18 лнше правьдъı S – лнхо правьдьı WGH; 5/25d18-19 лнше творнмъ S – лнхо творнтн WGH; 17/84a11[Ch] лнше S – лнхо WGH.

5.1.16. В статиите за предлози, употребявани с повече от един падеж, се обособяват подлеми за съответната рекция.

5.1.17. Падежната рекция при фрази се запазва, както е в изворите. Затова има лнхонмателемь бъıтн 5/21a2-3 в тв.п., но ндолослоужнтель бъıтн 38/174a16-17 в им.п. Фрази с разлики в числото на съществителните се представят вариативно, напр.:

чоудо (54 + 2[var])
....
| чоудо / чоудеса творнтн (1)
- θαυματουργέω (1): 34/157b8-9

5.1.18. За по-компактно представяне на данните изрази с различен словоред се лематизират към по-често употребявания – напр. единичната поява на не къ томоу се включва към по-многобройните на къ томоу не. Словосъчетания от типа вѣрѫ ıѧтн, бъıтн достоннъ се лематизират, като носещата основната семантика съставка излиза напред: вѣрѫ ıѧтн, достоннъ бъıтн.

5.2. За гръцки

5.2.1. Графично-правописните варианти се обединяват (напр. οὐ, οὐχ и οὐκ; ἐκ и ἐξ). Унифицират се фонетичните варианти с -ττ- и -σσ-, като се следва класическата норма, т.е. атическата традиция (θάλαττα, а не θάλασσα, γλῶττα, а не γλῶσσα, κηρύττω, а не κηρύσσω).

5.2.2. Глаголите се представят в 1 л. ед. ч. сегашно време изявително наклонение деятелен залог, респективно медио-пасивен залог при депонентните глаголи, освен ако засвителестваните форми в текста не са само медио-пасивни (вж. по-долу, 5.2.13). Суплетивните форми при глаголите се поместват под обща лема, напр. форми като ἰδόντες, ἰδεῖν, εἶδεν и пр. са включени в лемата ὁράω, а ῥηθείν, ἐρεῖ, εἴρηκεν, εἰπών и пр. – под λέγω. Към ὁράω се подрежда и формата ἰδού, която е глаголна по произход, но се е превърнала в частица. Извежда се самостоятелна лема οἶδα, когато перфектна форма от ὁράω е преведена с вѣдѣтн.

5.2.3. Суплетивните форми на прилагателните се лематизират като отделни леми, напр. κρείττων, βελτίων, ἀμείνων, ἐλάττων.

5.2.4. Компаративните форми на прилагателните се представят като подлеми към етимологично свързаните с тях положителни степени, т.е. μείζων към μέγας, πλείων към πολύς.

5.2.5. При субстантивираните прилагателни, инфинитиви и причастия членът се изписва след формата, напр. γεγεννηκώς, ὁ, а при адиективизираните наречия и предложни изрази – преди тях, напр. ὁ ἐξώ.

5.2.6. Подлемите за субстантивирани именни категории, наречия или изрази включват члена, но се представят само при пълнозначните думи, за да се избегне излишно дублиране в индекса, напр. ὁ ἐξώ се намира като фраза само при наречието, а ὁ τὴν πρὸ αἰώνων – при съществителното и предлога, докато при членните форми се указва само локацията на употребата им. Изключение са случаите, когато гръцкият член има еквивалент в старобългарския текст, напр. ὁ πότε – нжє бѣ 6/36b7-8 и др. В случаите, когато на старогръцко прилагателно име съответства съществително в старобългарския текст, считаме, че се подразбира, че гръцкото прилагателно е било субстантивирано, и го отделяме като подлема с член, независимо дали той е наличен или не в гръцкия текст.

5.2.7. Адвербиалните форми, образувани от прилагателни в среден род ед.ч., се представят като подлеми (за разлика от старобългарско-гръцкия индекс, където те са изведени самостоятелно в съгласие с палеославистичната лексикографска традиция). Когато на някаква адиективна форма в гръцки, различна от среден род ед.ч., съответства наречие в славянски, тя не се отделя в подлема, напр. директно под лема μόνος се дават употреби като μόνη 4/17b5 за тъкмѣ, μόνας 6/38b4, μόνους ***16/79d8***, μόνῳ 30/137c13 за тъкъмо, μόνος 42/196a9[Cs], μόνους 47/212d14 за тъчиѭ. Изключение се прави за някои често срещани адвербиализирани форми в дателен падеж, като напр. πολλῷ. Ако прилагателните не са употребени адвербиално, не се добавя гръцка подлема, дори ако в старобългарския превод съответства наречие.

5.2.8. Наречията, завършващи на -ως, се извеждат като самостоятелни леми.

5.2.9. Енклитиките се изписват без тежки ударения, т.е. τις, а не τὶς.

5.2.10. При местоименията τίς, τί / τις, τι се прави разграничение между формите за м./ж. и тези за ср.р., когато гръцкият го позволява

(т.е. извън съвпадащите за трите рода форми за род. и дат. пад. τίνι / τινί, τίνος / τινός, τίνων / τινῶν, τίσι / τισί) или когато славянският превод насочва към съответстващия род, напр. при корелация τινός – чєсо се извежда гр. подлема τι към основна лема τις.

5.2.11. При възвратните местоимения като основна форма се дава тази за м./ср. р. род. пад. ед. ч., т.е. ἑαυτοῦ, ἐμαυτοῦ, σεαυτοῦ.

5.2.12. В определени случаи, когато на гръцко прилагателно или наречие съответства славянска глаголна форма или обратно, се добавя [scil. ἐστί], напр. корелацията δῆλον – ꙗвлѧєть 9/55b4 се представя δῆλον [scil. ἐστί] – ꙗвлꙗтн; χωρίων ἀπολαύω καὶ πολλῶν προσόδων – богатъ [scil. ѥсмь].

5.2.13. Ако активната и медиалната форма на даден глагол се различават по своята семантика, втората се обособява в подлема, независимо дали славянските им корелати съвпадат или не, напр.:

ἀπόλλυμι (18 + 3[var])
- погѹбнтн (10): ...
- погѹблꙗтн (1): ...
- погъıбнѫтн (2): ...
- ѹмрѣтн (1): ...

| ἀπόλλυμαι (6 + 1[var])
- гъıбатн (1[var]): ...
- гъıбнѫтн (2): ...
- погѹблꙗтн (1[var]): ...
- погъıбатн (1[var]): ...
- погъıбнѫтн (5): ...

В резултат на това в старобългарския речник като корелати на един и същ славянски глагол се явяват и активната и медиалната форма:

погѹблꙗтн (1 + 1[var])
- ἀπόλλυμαι → ἀπόλλυμι (1[var]): 17/87c18[WG-Ch] » погъıбнѫтн S
- ἀπόλλυμι (1): 48/217b13

5.2.14. В определени случаи, когато даден гръцки глагол е засвидетелстван само в медиопасивната си форма, само тя се извежда като

основна лема, напр. глаголът σύρω се среща само на две места със словоформи ἐσύροντο (16/78c21) и σύρονται (14/72c20), затова се намира под лема σύρομαι.

5.2.15. Графичната разлика при изписване на имената на библейски лица в гръцки се запазва, защото тя диференцира различни библейски персонажи[29], затова имаме носнфъ срещу Ἰώσηπος и Ἰωσήφ.

5.2.16. За унификация са взети някои индивидуални решения, напр.: предпочетена е стегнатата форма ἄκων, а не ἀέκων; δέδοικα се лематизира като δείδω; характерното за по-късния византийски διαπαντός е разделено на διὰ παντός и се явява като фразова подлема към διά и πᾶς; запазва се навсякъде разделното изписване на μὴ τίς / μή τις и οὔ τις; θάτερος се извежда в отделна лема, а не като подлема на ἕτερος; вариантите οὕτω и οὕτως се лематизират като οὕτω(ς); редките случаи на τοῦτο ἐστίν са събрани под τουτέστι(ν); формите εἶγε и καίτοιγε са навсякъде разделени като словосъчетания, т.е. εἶ γε, καίτοι γε; частицата περ не се отделя самостоятелно (т.е. ὅτιπερ, а не ὅτι περ); ὅτ᾽ἄν се лематизира като ὅταν; запазва се разликата между διατί и διὰ τί.

5.2.17. При аналогични на описаните за старобългарски случаи се прилагат аналогични решения.

Корекции към изданието на *Учителното евангелие* и възстановени четения

В сив фон са маркирани поправки на словораздела, а с получер и двойно подчертаване се отбелязват коригирани букви. Всички корекции, направени от В. Криско[1], са отбелязани с (K) след локацията. Поправки по други публикации се указват специално, а липсата на сведение означава, че корекцията е дело на авторския екип.

Старобългарско-гръцки ономастикон

Списъците на собствените имена – топоними и антропоними – предлагат в синтезиран вид съдържащите се в старобългарско-гръцкия речник данни за тези специфични категории думи. Освен оними в тесния смисъл на термина (маркирани с получерен шрифт) са включени още прилагателни, производни от антропоними или топоними – както такива, които превеждат собствени имена в гръцкия текст (напр. маρннъ за Μαρία gen. или геннсаρетовъ за Γεννησαρέτ [scil. gen.]), така и такива, които несъмнено са образувани от лични или местни имена (напр. валаамль или платоньскъ* в части без преводно съответствие). Извън ономастикона остават прилагателни, за които не е ясно дали възхождат към жителски имена или топоними (напр. геρгесннькъ от странοу геρгесннскοу 13/GHW190b9add за τὴν χώραν τῶν Γεργεσηνῶν).

Двусъставните названия, най-често включващи лично име, придружено от прозвище, се представят и при двете думи, като при първата стои регистрираното съчетание, а от втората се препраща към него. Самостоятелно употребените прозвища също присъстват, защото в контекста назовават конкретни лица (напр. аφρнканъ и богословьць в оригинални части или крьстнтель за πρόδρομος в преводен текст). Ако те са засвидетелствани и в комбинация с име, се препраща към него с указание „cf.“, а ако не са, се пояснява само за кое лице се отнасят. Както в общия старобългарско-гръцки индекс, така и тук вариантите на топоними от различен граматичен род се дават поотделно (напр. вн҃ьлеемъ и вн҃ьлеома за Βηθλεέμ).

[1] Названието отпраща към мястото, където била погребана Рахил според Септуагинта (Gen 48:7), но няма точен аналог в Танах и затова понякога е смятано за обикновен апелатив. Споменава се като топоним в Ономастикона на Евсевий от IV в. (Freeman-Grenville, Chapman, Taylor 2003: 49, 136, 182; Conder & Kitchener 1883: 17; Newman 2005).
