Показалец на евангелските четива

Таблицата представя разпределението на неделните евангелски четива по слова. В случай на разлика между перикопата за деня и евангелския откъс, който в действителност се тълкува в преведената в словото катена[1], се дава информация и за него в колона „Тълкуван откъс в преведения източник“[2].

Атрибуцията в насловите на проповедите се цитира по Синодалния препис, а след сиглата му се добавят и тези на съвпадащите с него източници без оглед на графичните разночетения. При наличие на варианти те се представят по същия начин, като изписването е по първия посочен източник.

Под данните от ръкописната традиция се дават коректните атрибуции на съвременен български, а имената на допълнително идентифицираните автори, чиито коментари са преведени в тълкувателните части на УЕ, се маркират с получер шрифт[3]. При повече автори на наличните в дадено слово текстове, имената им се подреждат според обема на включените от тях откъси.

---

[1] Обхватът на евангелските перикопи е сравнен с публикациите на Матеос (Mateos 1963) и Галучи (Галлуччи 2001). В случай на разминаване между тях данните за евангелското четиво се дават по Матеос, а за тълкуването – по Галучи (вж. напр. слова 3, 17, 49, 51). При необходимост се добавят уточнения под линия.

[2] Например към Евангелието на Марк не е известен катенен коментар, подобен на многобройните катени към останалите три евангелия и затова в словата към перикопи от Марк са преведени тълкувания на паралелни откъси от Матей, взети от катената към това Евангелие. Подобен е случаят и при някои от словата към Лука, за чието съставяне се използва катената към Матей поради липса на коментар в катената към Лука. По-подробно вж. Котова 2022б: 105-106, 2023: 29-30, 36. Прибягването до тълкувания на Йоан Златоуст към Евангелието от Матей за четива от Марк и Лука е дискутирано още у Galluci 2001: 54.

[3] Използвани са следните публикации на Д. Котова, свързани с уточняване на авторите на тълкуванията: Котова 2022б, 2023; 2024б; Kotova 2024. Неточните атрибуции към Изидор Пелусиот са неколкократно обсъждани и е единодушно прието, че тълкуванията в съответните слова принадлежат на Кирил Александрийски (Горский, Невоструев 1859: 416-419, 424; Gallucci 2001: 54; Toca 2021: 240-241). Наличието на текст на Север Антиохийски в трето слово е отбелязано от В. Криско (Крысько 2017: 59), а Г. Митов разглежда фрагмента от писмо на Изидор Пелусиот в тридесет и пето слово (Mitov 2024).

[5] С оглед на това, че предходното слово е атрибуирано на Кирил Александрийски, би следвало да се предположи, че тогожде в S приписва слово 33 на този автор. Тази интерпретация се разколебава от следните аргументи: 1) насловите с тогожде в S обхващат още слова 34 и 35, а във WGH и трите слова са посочени като изцяло (33 и 34) или частично (35) Златоустови; 2) слова 33 и 34 всъщност съдържат само текстове от Йоан Златоуст, а 35 включва и негови, и откъси от други отци. Следователно има основание да се мисли, че подразбиращият се автор и в S за 33 слово е Златоуст.

Библейски цитати

Настоящите списъци включват библейските цитати от Стария и Новия завет в състава на словата от *Учителното евангелие* на Константин Преславски. За цитат се смята всяко библейско място, което формира разпознаваема фраза. Самостоятелни думи в екзегетичната част на словата не са представени в настоящите списъци. Според приетите критерии тук са обхванати както точни цитати, така и по-свободни (маркирани със знак „~“ след съответното библейско място, напр. Мк 12:28~). Разграничаването им се основава на някои общоприети принципи при установяване на библейски цитати в патристични текстове[1]. В процеса на работа освен старозаветните цитати, които не са обект на изследванията на Жени Жикова[2], бяха идентифицирани и множество новозаветни цитати, неотбелязани от авторката. За да се открои тази нова информация, сигнатурите на всички допълнително установени от нас цитати от Новия завет се маркират с подчертаване, напр. *0/2b12*.

Данните за библейските цитати са систематизирани в два списъка: в първия по обичайния начин според реда на библейските книги, а във втория – по реда на словата, за да може да се проследи по-лесно наборът от библейски препратки във всяко от тях и връзката им с темата на съответната неделна перикопа. Повечето от цитатите се намират в централната екзегетична част на словата, но нерядко се използват и в техните уводи и заключения[3]. За да бъде видима позицията им, в първия списък към сигнатурата на цитатите от уводните части се добавя (У), а от заключителните – (З). Липсата на буква след сигнатурата означава, че цитатът е използван в централната част от словото.

[2] Жикова 2017а, Жикова 2017б.

[3] За структурата на словата и ролята на уводите и заключенията, вж. Котова 2024а.

Във втория списък данните за всяко слово са разделени според местоположението им в неговата структура – в увода, тълкувателната част или заключението. В началото на всяко слово е посочена евангелската перикопа за съответната неделя от църковната година. В случаите на разминаване между евангелското четиво за деня и новозаветния откъс, който се тълкува в преведения източник, данните се посочват паралелно, разграничени с двойна наклонена черта, напр. Мт 14:22-34 // Мт 14:22-36.

Понякога един и същ цитат може да бъде отнесен към две или повече библейски книги. За да се избегнат ненужни дублирания на препратки, които са проверими в съответните издания на библейските текстове или в евангелския синопсис на К. Аланд (1996). При наличие на повече от една възможна атрибуция въведохме йерархизирани критерии на подбор. Предпочитание се дава на: 1) цитатите от евангелското четиво за деня и/или от откъса, тълкуван в преведения източник (напр. цитатът вѣра твоꙗ спсе тѧ 34/158a20-b1 е идентифициран само по Лк 8:48, без паралелите по Мт 9:22 и Мк 5:34); 2) новозаветните пред старозаветните цитати (напр. цитатът людиե сиⷭ оустьнамⷭ своⷭмⷭ ѹьтоу҃ть мꙗ· а сьрьдьцꙗ нхъ далеуе отъстоꙗть ѿ мене· 38/181d2-8 е отнесен само към Мт 15:8, но не и към Ис 29:13); 3) цитатите с по-голяма текстуална близост при новозаветни референции, които не попадат в обсега на тематизираните в словото перикопи (напр. при цитата вамъ есть дано ра҃зоу҃мѣтн таннъ цр҃ствїꙗ· онѣмъ(sic!) онѣмъ же ... не дано· 31/140c17-21 се препраща не само към Лк 8:10 от четивото за деня, но и към Мт 13:11, защото изразът онѣмъ же реуе не дано има паралел само там – ἐκείνοις δὲ οὐ δέδοται). В случаите, когато са налице две или повече библейски препратки, в първия списък информацията се представя при всяка от тях, като в скоби се дават другите възможни атрибуции (напр. цитатът любите врагы ваша· и молите сѧ ҃за напастоу҃ющиⷯъ васъ· и бл҃вте клноу҃щаꙗ васъ· и добро творите ненавидѧщиⷯмъ васъ *29/135b12-20* е отбелязан и при двете евангелия – Мт 5:44 (Лк 6:35) и Лк 6:35 (Мт 5:44), защото има съвпадение, от една страна, с назначеното четиво, а от друга – с тълкувания откъс в гръцкия източник). Във втория списък такива препратки се изброяват според реда на библейските книги, напр. 30/136c21-d2 (Мт 22:32; Мк 12:27; Лк 20:38).
